AUSTIN BUTT

Burlington, VT ■ 413-575-2939 ■ austin.butt@mymail.champlain.edu ■ linkedin.com/in/austin-butt

EDUCATION

Champlain College, Burlington, VT — Expected May 2026
B.S. Game Programming, Minor: Computer Science

EXPERIENCE

Ubisoft Game Lab Competition - *Networking & Engine Programmer* — Spring 2025
C#, Unity, Photon: Fusion, Client-Server Architecture

- Built low-latency client-server architectures in C++ for a 10-week game jam project, supporting synchronized gameplay and deterministic core systems alongside Ubisoft employees
- Presented and tested games at indie game conventions and Ubisoft headquarters in front of judges

Option10: Purrsuit - *Systems & Physics Programmer* — Fall 2025
C++, Unreal Engine, Physics Optimization

- Implemented optimized interaction and physics subsystems, reducing update costs and improving gameplay responsiveness across multiple build iterations
- Integrated feedback from active community of over 150 members

AABB Water Physics Simulation — Fall 2024
C, Custom ECS Physics

- Developed axis-aligned bounding box collisions using a custom built ECS-based physics particle system
- Simulated and calculated physics on particles using buoyancy and Archimedes' Principles

Meta/MusicGen: Adaptive Music — Fall 2024
C, Meta AI API, Python

- Engineered and Implemented a system to create dynamic and adaptive music in a video game incorporating Meta's artificial intelligence music generation subsystem

RELEVANT COURSEWORK

Data Structures and Algorithms

- Designed and developed data structures and algorithms in software applications using multithreading

Database Management

- Became proficient in SQL and relational database design
- Implement database administration topics such as replication, backup, recovery, and account management

Game Architecture

- Produced, implemented, and developed game subsystems in teams such as animators, physics simulations, game AI, data and rendering pipelines, and event systems from scratch

Game Studio I, II, III

- Worked in multidisciplinary teams of 5-7 people to develop 2D and 3D games using Unity and Unreal
- Hosted game testing labs with 10-30 students applying actionable feedback from testers

INDUSTRY EVENTS

Steam Developer Conference (2025), Ubisoft Game Gala (2025), Dawson Indie Games Convention (2025)

TECHNICAL SKILLS

C++, C#, Physics, Networking, AI, Unity, Unreal Editor, Java, HTML, SQL, OpenGL
